The editor found that the present version needs to be modified as in the following.

- (1) As was pointed out by the first referee, the resolution of Figures 3.1 and 3.2 is somewhat low. So, you should use figures with higher resolution. In fact, this comment applies to all the figures in the paper.
- (2) In fact, in almost all figures and tables in the paper, the letters are also too small. Please try to magnify them.
- (3) p. 2, Figure 1.2: The site “<http://visla.kr/?p=18146>” is referred to in the caption. But, such a site seems to be very unstable and may be deleted soon. Please re-consider such a citation.
- (4) p. 8, just after Table 4.2: The  $5 \times 14$  matrix  $A$  is not presented in a correct way. Please also magnify it so that the numbers are readable.
- (5) p. 10, Please arrange the first line for the reference [5].
